1 About

- My name Nazar, and I'm a passionate Java developer eager to tackle real-world problems, experiment with algorithms, and dive into complex backend challenges. While I have limited experience in frontend development and am not particularly interested in it, my expertise lies in Java, Spring Boot.

I constantly stay updated on emerging technologies and love experimenting with them. As student of the best Slovak technical university I am very flexible in my work, as I am fully developed in all fields, maybe not perfect, but writing tests, deploying projects or switching to another language or platform will not be a problem for me.

2 Education

- **Faculty of Informatics and Information Technologies, Slovak University of Technology,** Bratislava, Slovakia 2022–2026
 - Degree: Bachelor's
 - GPA: 1.86/5.0
 - Year: 3

3 Skills

- **Programming Languages:**
 - **Main:** Java, JavaEE, Spring Framework
 - **Also know:** Python, C, C++
 - **Database technologies:** PostgreSQL, SQLite
- **Tools & Technologies:**
 - **DevOps:** Git, Docker
 - **Development:** Unit-Testing, JUnit, Maven, JIRA, Swagger
 - **Documentation:** LaTeX, Microsoft 365, Markdown
 - **Networking:** Subnetting, IPv4/6, TCP/IP, REST API, Websockets
- **Languages:** Ukrainian (native), Russian (native), Slovak (B2), English (B2)

4 Projects

- **"UniMap" — Educational Platform (In Development)** 2025—Present
 - A comprehensive platform enabling FIIT STU students to access real-time information about courses, faculty, and peer reviews
 - Features offline functionality, modern interface, and cross-platform compatibility
 - Full-stack project demonstrating end-to-end development skills across multiple platforms
 - **Backend Server**
 - * Secure API server handling authentication, data processing, and database operations
 - * **Primary technologies:** Spring Boot, PostgreSQL, REST API, JWT Authentication
 - * **Supporting technologies:** OAuth2, JBCrypt, Docker, Maven, JavaMail
 - * GitHub: https://github.com/Faustynn/UniMap_SERVER
 - **Mobile Application**
 - * Cross-platform mobile client for iOS and Android with complete feature parity
 - * **Primary technologies:** React Native, JavaScript, REST API, Firebase
 - * **Supporting technologies:** Recoil (state management), Tamagui (UI), WebSockets, Stripe API
 - * GitHub: https://github.com/Faustynn/UniMap_Mobile
 - **Desktop Application**
 - * Windows desktop client with seamless mobile integration for authentication
 - * **Primary technologies:** Java, JavaFX, REST API
 - * **Supporting technologies:** WebSockets, Lombok, Maven, Docker
 - * GitHub: https://github.com/Faustynn/UniMap_CLIENT

5 Certifications

- **CCNA: Introduction to Networks, CISCO** December 2024
